

Schematic architecture of the seven hybridisation types (H1-H7)

General couplings each type names (§4.1); not one specific paper's implementation.

H1 Metaheuristic → hyperparameters

H2 Metaheuristic → weights

H3 Physics + data

H4 Architecture fusion

H5 Heterogeneous stacking

H6 Decomposition then learn

H7 Symbolic-numeric

Legend

Base learner / model component

Metaheuristic / search component

Data, physics or decomposition component

Non-learned intermediate quantity
